

CodeAlpha Calculator Program in C

Calculator Program using Switch Case

```
#include <stdio.h>

int main() {
    float a, b;
    int choice;

    printf("Enter two numbers: ");
    scanf("%f %f", &a, &b);

    printf("\n1. Addition");
    printf("\n2. Subtraction");
    printf("\n3. Multiplication");
    printf("\n4. Division");
    printf("\nEnter your choice: ");
    scanf("%d", &choice);

    switch(choice) {
        case 1:
            printf("Result = %.2f", a + b);
            break;
        case 2:
            printf("Result = %.2f", a - b);
            break;
        case 3:
            printf("Result = %.2f", a * b);
            break;
        case 4:
            if(b != 0)
                printf("Result = %.2f", a / b);
            else
                printf("Division by zero not possible!");
            break;
        default:
            printf("Invalid choice!");
    }

    return 0;
}
```
